Summary

Summary
Experience: 3 years of total experience, with a strong background in C#, .NET, and SQL Server, including 2 years of hands-on development and optimization of database-driven applications.

Experience

▷ Backend Developer

Dexfiat
Jun 2022 - Aug 2023 (1 year 3 months)
Responsibilities:

- Integrated DeFi protocols and services into the application, providing seamless access to DeFi opportunities.
- Integrated multiple blockchain networks, including Ethereum and Binance Smart Chain, for efficient asset management and smart contract interactions.
- Developed and maintained smart contracts to facilitate various application functionalities, such as token creation, staking, and yield generation.
- Implemented robust security measures, including encryption and vulnerability assessments, to protect user data and funds.
- Designed the backend infrastructure with scalability in mind, ensuring optimal performance as user adoption increased.
- Created and maintained RESTful and GraphQL APIs for efficient communication between the frontend and backend.
- Managed data storage and retrieval processes, optimizing data availability and system efficiency.

Impact:
- Increased access to DeFi opportunities, resulting in a 20% growth in user engagement and investment.
- Efficient blockchain integration reduced transaction times by 15% and improved asset management for users.
- Smart contract deployment led to a 10% increase in user interactions and token utilization.
- Enhanced security measures reduced vulnerabilities and protected user data, resulting in zero security breaches.
- Ensured system scalability, accommodating a 30% growth in user base without performance degradation.
- Efficient API development improved data retrieval speed by 25%, enhancing user experience.
- Optimized data management saved 15% on operational costs and ensured data availability at all times.

Awards:

- Recognized with the "Innovator of the Year" award in 2023 for contributions to the development of decentralized finance solutions.

Back End Developer
Cardinal Health
May 2023 - Present (7 months)
Responsibilities:

* Managed and ensured the secure storage, retrieval, and management of sensitive patient information.
* Developed and integrated Electronic Health Record systems to facilitate comprehensive patient care and improved communication among medical professionals.
* Successfully integrated video conferencing and secure messaging functionalities for virtual consultations between healthcare providers and patients.
* Created and maintained scheduling and booking systems, reducing wait times and improving healthcare access.
* Developed modules for data analysis and health trend monitoring, enabling healthcare professionals to make data-driven decisions for treatment and prevention.
* Ensured compliance with healthcare regulations, including HIPAA and GDPR, to protect patient data and privacy.

Impact:

* Enhanced data security, leading to a 20% reduction in data breaches and ensuring the privacy of patient information.
* Improved communication among medical professionals, resulting in a 15% increase in the efficiency of patient care and treatment.
* Facilitated virtual consultations, reducing in-person visits by 25% and improving access to healthcare services.
* Streamlined appointment scheduling, reducing wait times by 30% and increasing patient satisfaction.
* Enabled data-driven decision-making, resulting in a 10% reduction in treatment costs and a 5% improvement in patient outcomes.
Awards:

* Recognized with the "Healthcare Innovator of the Year" award in 2023 for contributions to the development of healthcare solutions.

Education

Federal University of Technology Akure
Bachelor of Technology

Licenses & Certifications

C# For .Net - Board Infinity

Skills

.net   •   data analysis   •   Software Development   •   Git   •   GitHub   •   ASP.NET Web API   •   C#   •   Microsoft SQL Server   •   Figma (Software)   •   Visual Studio
